WASHING METHOD FOR CANVAS, ETC., AND AUXILIARY BAG

Inventor:	Koichi Hosokawa 2-28-5 Ichihime, Kanetsu-cho, Sakai-gun, Fukui-ken
Applicant:	Koichi Hosokawa 2-28-5 Ichihime, Kanetsu-cho, Sakai-gun, Fukui-ken
Agent:	Hikoharu Hirasaki

[There are no amendments to this patent.]

Claims

1. A washing method for canvas, etc., characterized by the fact that canvas, etc. is accommodated in an auxiliary bag which is strong and has flexibility, liquid detergent is added, the opening is sealed, the bag is placed in a washing tub of a washing machine, then agitated to wash off the adhered soil.

2. An auxiliary bag, characterized by the fact that it is an auxiliary bag for accommodating canvas, etc. and washing out the adhered soil with a washing machine, the bag is

strong and has flexibility, and the opening is completely sealed so that the accommodated canvas, etc. and the liquid detergent do not leak out.

3. An auxiliary bag noted in Claim 2, characterized by the fact that a zipper comprising recessed and projected parts which mutually join is provided doubly.

4. An auxiliary bag noted in Claim 2, characterized by the fact that a button and zipper comprising of recessed and projected parts which mutually join are provided at the bag opening.

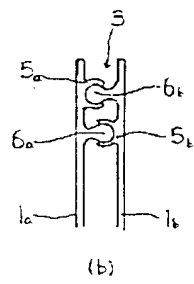

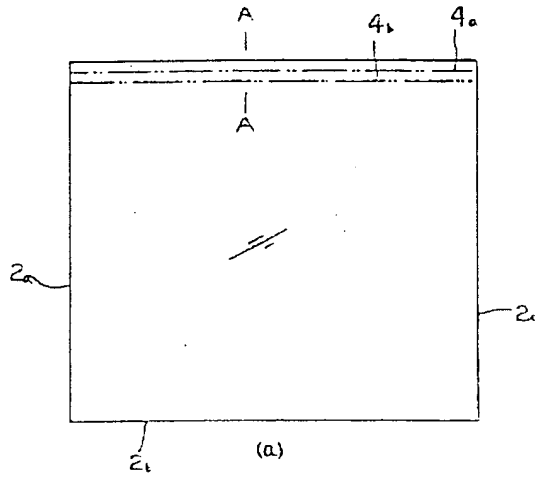

5. An auxiliary bag noted in Claim 2, characterized by the fact that magic tape and a zipper comprised of recessed and projected parts which mutually join are provided at the bag opening.

6. An auxiliary bag noted in Claims 2-5 which provides a button, magic tape, etc., to the opening side of the bag so that the canvas, etc. is not displaced.

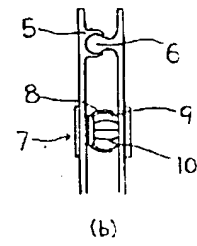

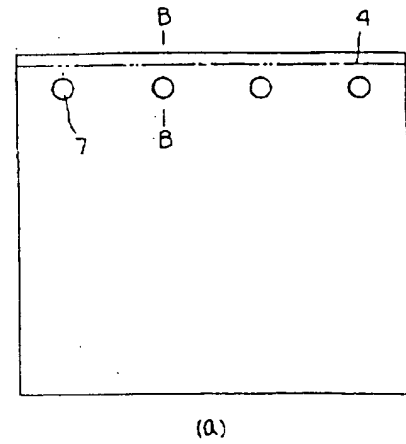

7. An auxiliary bag noted in Claims 2-6 with a corrugated irregular surface.

8. An auxiliary bag noted in Claims 2-7, which applies a mildew-proofing treatment to the inside surface of the bag.
